

# CONVEYOR SYSTEMS

Various conveyors of different types make up an integral part of woodworking production chain. The product range of Hekotek includes various conveyors for logs, lumber and bulk materials.

Selection of technical solution depends on the required capacity and characteristics of the material handled.

---

## FACTS AND FIGURES OF HEKOTEK EXPERIENCE

**OVER 30 PROJECTS** | of by-products conveyor systems for sawmills implemented by Hekotek

**10 MLN M<sup>3</sup>** | overall annual capacity of by-product conveyor systems supplied by Hekotek

**30 YEARS** | experience of conveyor systems manufacture

**11 COUNTRIES** | geography of conveyor systems supplied by Hekotek in the world

### FOR LOGS

- One- and two-chain conveyors for efficient log centering (for logs diameter up to 800 mm)
- Solutions for feeding logs to conveyors that move sideways – multi-purpose log kickers of different shapes
- Accumulating chain conveyors for logs

### FOR LUMBER

- Multi-purpose belt conveyors of different width and capacity
- Boards accumulating conveyors
- Board separators – technical solutions depending on the line capacity and lumber features
- Conveyors for transporting lumber packs: sideways (chain guide conveyors) and lengthwise (roller conveyors)

### FOR BARK, WOOD CHIPS, SAWDUST AND WOOD WASTES

- One- and two-chain scraper conveyors of different width
- Belt conveyors of various widths and capacity to meet the needs of the sawmill main equipment
- Screw conveyors, diameter depending on the unit capacity
- ‘Walking floor’ systems – for feeding chips, sawdust etc. to various units – e.g. boilers, pellet plants, etc.
- Combined solutions equipped with screens, chippers, shredders, metal detectors (magnets) and pneumatic transport
