

# LOG INFEED LINES

Hekotek offers various conveyor solutions for transporting logs to debarkers, sawlines, chippers, as well as for plywood industry.

## FACTS AND FIGURES OF HEKOTEK EXPERIENCE

**OVER 50 LINES** | for log infeed built and launched by Hekotek

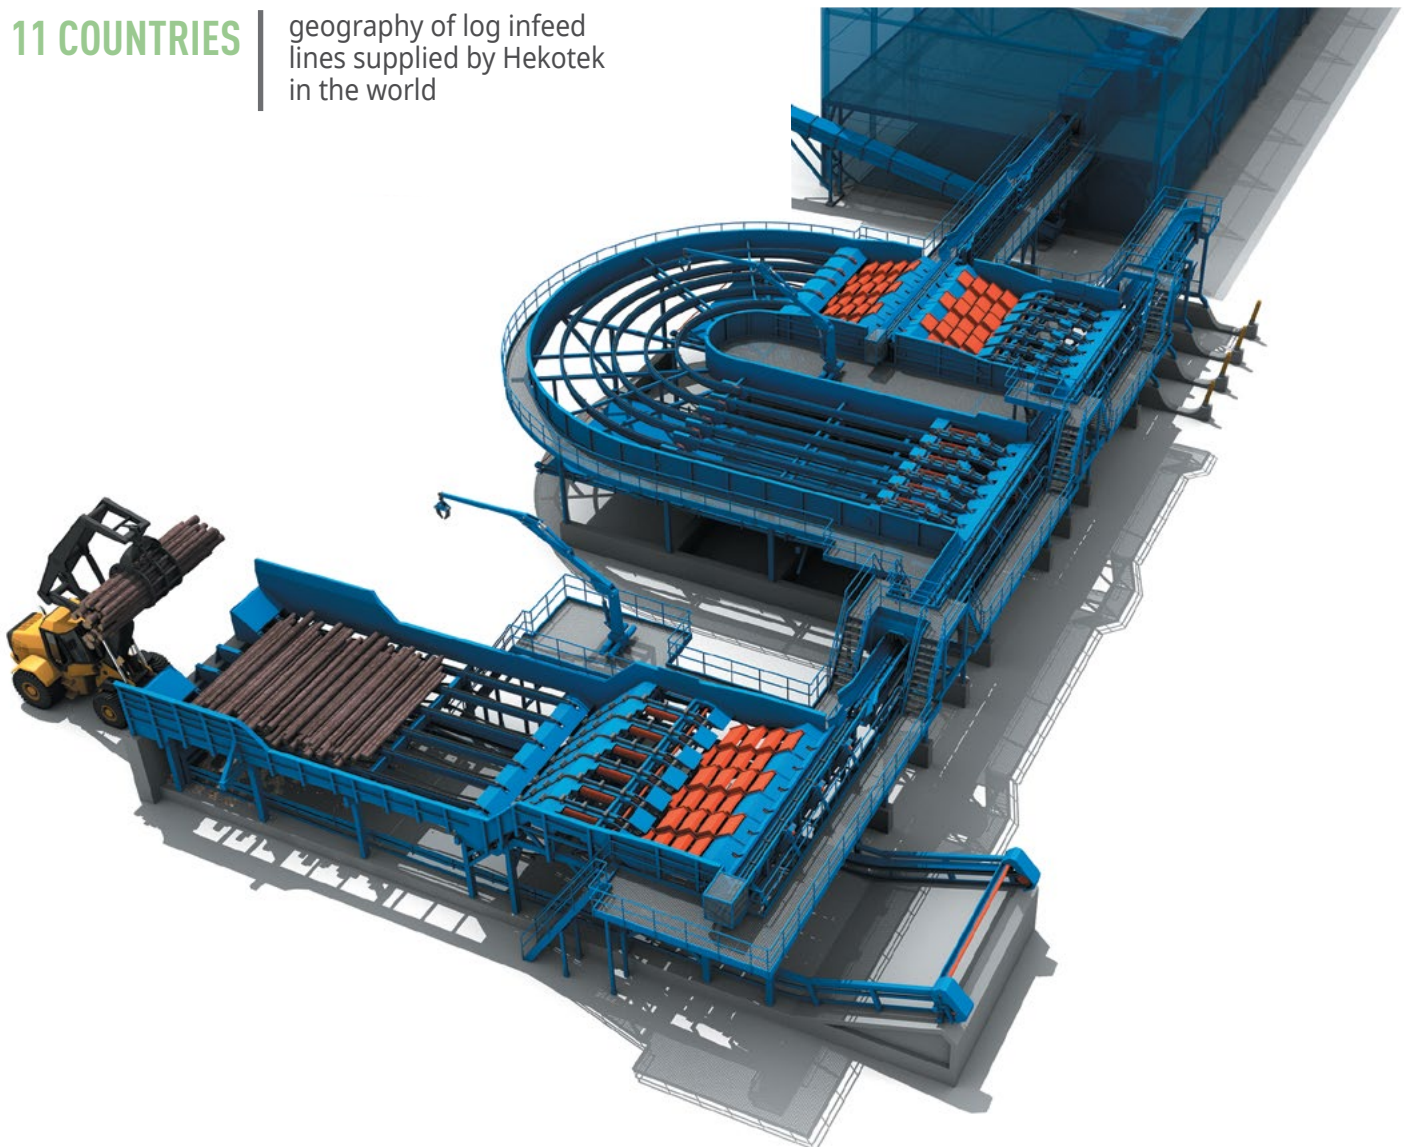

**25 MLN M<sup>3</sup>** | overall annual capacity of log infeed lines supplied by Hekotek

**25 YEARS** | experience of log infeed lines manufacture

**11 COUNTRIES** | geography of log infeed lines supplied by Hekotek in the world

## VARIOUS SOLUTIONS

- One- and two-staged log decks with log separators (step feeders or screw elevators) ensuring one by one log feeding
- One- or two-chain log centering conveyors fitted with carriers
- Different log turning and orienting systems: compact log turners for smaller logs and curve conveyors (180° and 90°)

## TECHNICAL FEATURES

- Log parameters:  
diameter – 80-600 mm,  
length – 3,0-6,2 m
- Special solutions for logs of  
larger diameters and shorter logs  
(from 1,8 m)
- Line speed – up to 200 m / min.
- Line capacity – 20-40 pcs./min,  
10 000 pcs./shift
- Advanced log measuring systems  
with the function of log volume  
calculating
- Additional option –  
diameter- and length-based log  
rejecting
- Processor-based control system  
with computer screen visualization  
and generating of various reports  
on the logs fed
- Line automation remote support
- Conveyors supporting structures  
made of strong steel
