

Various conveyors of different types make up an integral part of woodworking production chain. Hekotek range of products includes various conveyors for logs, sawn timber and bulk materials

FOR LOGS

- One or two chain conveyors with different carrier shapes for efficient log centering (for logs up to 800 mm diameter)
- Solutions for feeding logs to conveyors that move sideways – multi-purpose log kickers of different shapes
- Chain accumulating conveyors for logs

FOR SAWN TIMBER

- Multi-purpose belt conveyors of various width and capacity
- Accumulating conveyors for sawn timber
- Board separators – technical solutions depending on line capacity and sawn timber specific features
- Conveyors for transporting sawn timber packs sideways (chain guide conveyor) and lengthwise (roller conveyor)

FOR BARK, WOOD CHIPS, SAWDUST AND WOOD WASTES

- One and two chain scraper conveyors of various width
- Multi-purpose belt conveyors of various widths and capacity, according to the general technical solutions of the sawmill
- Screw conveyors, diameter depending on the unit capacity
- 'Walking floor' feeding systems – for feeding chips, sawdust etc. to various industrial installations – e.g. boilers, wood pellet mills
- United solutions with sieves, chippers, shredders, metal detectors (magnets) and pneumatic transport

REFERENCE LIST OF CONVEYOR SYSTEMS DELIVERIES

Estonia:

Stora Enso Imavere Sawmill
Stora Enso Näpi Sawmill
Stora Enso Sauga Sawmill
Viiratsi Sawmill
Vara Sawmill
Balti Spoon – conveyors for veneer production
Valmos – conveyors for veneer production
Kuusakoski – conveyors for metal wastes transportation
Horizon Pulp and Paper Mill – chips storage facilities ('walking floor' type) with conveyors

Belarus:

FLLC Swoods Export (Borisov)

Finland:

Havesa Timber (Hamina)
JPJ Wood (Juupajoki)

France:

Seignol (Saint-Priest-La-Prugne)
Chabbert (Mazamet)

Germany:

Gelo Holzwerke (Weissenstadt)
Ludwig Ziegler (Plössberg)

Latvia:

Stora Enso Launkalne Sawmill
Vika Wood (Talsi)
Kurekss (Ventspils)

Lithuania:

Stora Enso Alytus Sawmill
Ludwig Ziegler (Plossberg)

Poland:

Steico (Czarnków) – log feeding conveyors to debarking and chipping line, conveyors for bark and wastes

Russia:

Boguchansky LPK (Krasnoyarsk kray)
Demidovo Plywood Mill (Vladimir region)
DOK Enisey (Krasnoyarsk)
LDK Igirma, SEL-Tairiku, Yantal-Les (Irkutsk region)
Lesozavod 25 (Arkhangelsk)
Lesplitinvest, Metsä Svir (Leningrad region)
Onega LDK (Arkhangelsk region)
Sevlespil (Syktyvkar)
Stora Enso Nebolchi Sawmill (Novgorod region)
Svetogorsk JSC (Leningrad region) – log feeding conveyors to debarking and chipping line
Terneyles (Primorsky kray)
ÜPM Pestovo (Novgorod region)

Sweden:

Södra Timber Langasjö – 'walking floor' type feeding systems for pellet mill

Uruguay:

Tigoral (Tacuarembó)
